Re: Draft Patent Application entitled "WIRELESS APPLICATION
PROTOCOL TELEPHONE" IBM Docket No. AUS920010365US1; Our
File No. 7047-P437US

Dear Dwip:

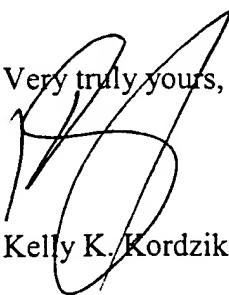

Attached is a first draft of the patent application covering the above-identified invention, together with a copy of the drawings. Please review the application and drawings, along with your co-inventors, for technical mistakes and/or omissions. Please note on the attached copy any comments or revisions you deem necessary, keeping in mind that someone skilled in the art should be able to practice your invention by reading the final version of the application.

Also, please be reminded of your duty of candor, *i.e.*, the responsibility of bringing all relevant art and facts pertaining to this invention, of which you are aware, to the attention of the Patent Examiner. If you will please relay such information (*e.g.*, copies of relevant patents or technical articles in your possession) to me or Volel Emile of IBM IP Law, either of us will see that it is disclosed to the U.S. Patent and Trademark Office ("PTO").

After you have completed your review of this application, please provide me with your comments. (You may fax your revised copy to me at 457-4237.) I will then incorporate your remarks and place the application in condition for filing with the PTO. The original will be sent to IBM to be formally executed by you.

If you have any questions, please do not hesitate to contact me at 370-2851.

Very truly yours,

Kelly K. Kordzik
